

Made in the
USA

JanaBand®

Size: 11.25" x 1.875"
Weight: .9 oz.

A patient's call button is safely kept within reach.

Lines and cables are kept organized and easily accessible.

Get Organized! Stop Trips and Falls!

The JanaBand® was designed, tested, and evaluated to organize and retain different size cables, tubes, wires, and lines at a fixed location on any hospital bed or auxiliary equipment.

Hospital personnel have identified the JanaBand® as an invaluable tool for increased organization, safer management and quicker identification of all types of patient care connections.

The main advantages are as follows

- Simple and cost effective
- Secure attachment to beds and a variety of other devices
- Reduced set-up and/or shift change time requirements
- Expedient "Quick Release" overlap design
- Added convenience for staff, patients and visitors
- Reduced possibility of contamination
- Reduced possibility of errors and misconnections
- Environmentally friendly, recyclable, latex-free construction
- Custom colors and logos available

"One Hospital Bed - One Call Button - One JanaBand® "
